

INTEGRATED TEST SUITE OVERVIEW

HIGH PERFORMANCE TECHNOLOGY FOR MORE
FLEXIBLE, USER-FRIENDLY TEST APPLICATIONS

INTEGRATED TEST SUITE: PERFORMANCE TO MATCH YOUR TEST

To help you run more tests, faster than ever with less test operators and specialists, Moog has invested heavily to develop an Integrated Test Suite that can answer your test needs today and in the future.

Whether your test requirements are basic or highly sophisticated, the Moog Integrated Test Suite provides the exact features you look for while adapting to test operator skill level and optimizing costs.

Listening to our customers and studying their requirements led us to develop an Integrated Test Suite that leverages the world class performance of Moog electric and hydraulic systems, Test Actuators, Servo Valves, Test Controllers, Servo Drives and Servo Motors.

Unsurpassed innovation and technological expertise combined with close customer collaboration make Moog a leader in the design and development of high-performance motion control test systems. The features of the Moog Integrated Test Suite have been designed to support both complex as well as simple testing and ensure that test results are captured efficiently.

Our total focus on meeting your unique test requirements means you can rest assured you're using the most flexible, highest performance test software available anywhere.

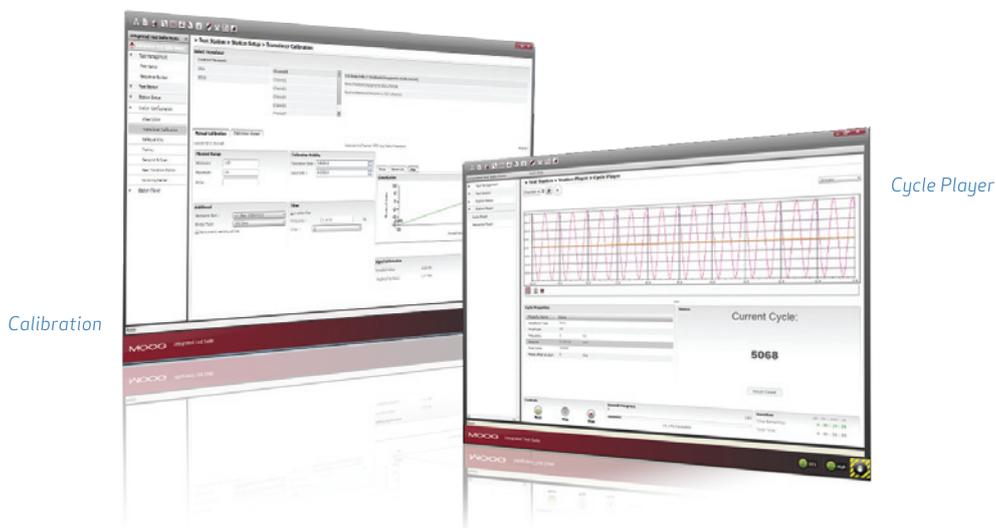

DESIGNED FOR THE NEEDS OF TODAY—AND TOMORROW

The Moog Integrated Test Suite not only incorporates technology that delivers maximum flexibility and efficiency, it is designed around how customers use test software. In fact, its specifications actually reflect working habits and business challenges on a global level.

For example, the number of experienced test system operators is declining, so manpower optimization requires people to switch departments more often and companies face higher staff turnover.

Moog's new software architecture resolves the trade-off between the need for a greater software sophistication and increased user flexibility to match operator skills by using a highly intuitive screen that can be customized for your processes.

By listening closely to the needs of our customers around the world, and observing how they work, we've designed the Integrated Test Suite to take applications further than ever thought possible.

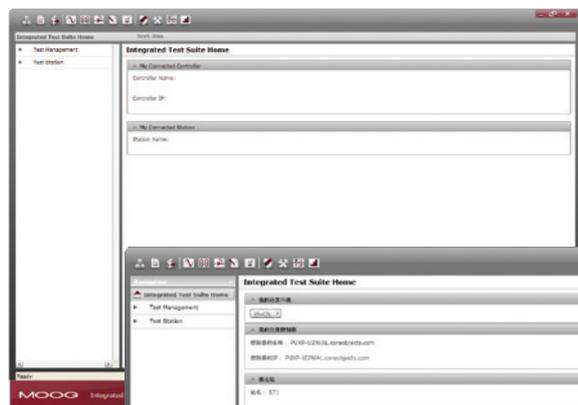

FASTER, MORE EFFICIENT TESTS

The key features of the Integrated Test Suite will bring you real benefits to set up and run more tests faster and efficiently anywhere in the world thanks to optimal algorithms, state-of-the-art workflow and a centralized database.

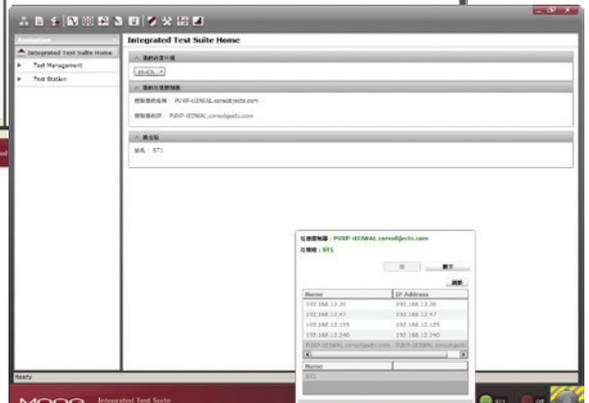

Reach higher sophistication and preserve intuitive ease of use through:

- Select user interface language
- Highly intuitive screens
- Ease of use for junior operators to start with basic tests
- Integrate modules for complex tests
- Customize your screens to match your processes
- Enjoy the modularity of the Test Suite as your test needs develop or expand
